INTERNATIONAL FREIGHT FORWARDER

5 factors for success

Global coverage

By our partners we benefit from the support and collaboration of over 200 correspondents from the whole world. We are specialised in different segments of freight transport, so we can come up with optimal solutions for different requirements.

Flexibility

We can easily adjust to the freight transport requirements of our customers. By flexibility in commercial relations, we organise transports for companies from various fields of activity (textiles and garment on coat hangers, commodities, electronics, High-Tech, personal care products, household appliances, furniture, mechanical products and spare parts).

Specialised Services

We are recognised today by a large part of garment manufacturers from Romania as reliable partners in the organisation of transport of textiles and garment on coat hangers. As we are passionate about what we do, we always seek to consolidate such Specialised Services also for other industries. Apart from the transport of general goods and not only, we come to welcome our customers with customs assistance and customs clearance services necessary for the international (extracommunity) transport of goods.

Relevant Experience

In order to guarantee the satisfaction of our customers, the team Ma.Ra Logistics Quality, with an experience of over 20 years, permanently develops its resources, knowledge and competences in the field of Transports and International Forwarding.

Cost Advantage

With solid partnerships with vendors, carriers and other providers of services, we can guarantee the competitiveness of our fees.

Road Transport

▣ *Intracommunity*

Less than truckload

Our main activity is the transport of goods in Less than Truckload regime (LTL). We collect the goods by using the Order Management System, which organises the transport of goods with the same destination.

Full truckload

If you have to transport quantities or high volumes of goods, we offer you assistance regarding the import-export procedures, documentation, type of truck and necessary equipment to guarantee the transit time and quality of the service offered.

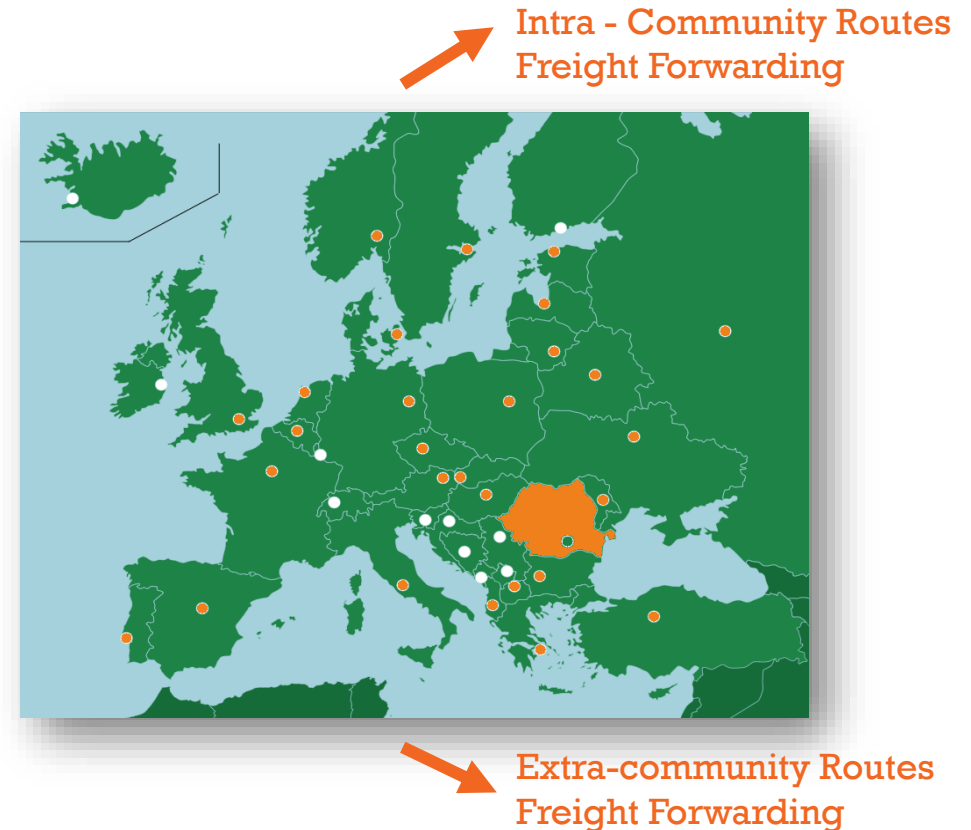

▣ *International or extracommunity*

Apart from the classical procedures of intracommunity transport, in the international freight transport these procedures become more complex because the countries to/from which the freight transport is organised are not part of European Union.

▣ *Internal transport*

We organise both loading for the export goods which will be dispatched in less than truckload and the delivery to final destination of merchandise in less than truckload arrived from import.

Daily pick-ups and deliveries for groupage and full loadings

Sea Transport

Our network of correspondents at world level allows that your goods is shipped to the final destination regardless of the volume, quantity and transport version chosen FCL or LCL.

The maritime transport is accomplished in the following ways: container 20' and 40', standard universal, vopen-top, high cube, flat rack, platforms, freezer-reefer, tank containers.

▼ LCL – Less than a Container Load

If you do not have sufficient merchandise to load a full container, Ma.Ra Logistics Quality can collect and consolidate the goods of your company with the goods of other companies in a single container, in order to be shipped to the desired destination.

The quality of offered services and competitive costs are essential for this type of transport.

▼ FCL – Full Container Load

We can make available in the factory or at your supplier all the types of containers and necessary documentation in order to transport the goods in maximum safety conditions.

▼ Multimodal

Our team can assist you in finding the best transport route, by combining the maritime and air transport, so that you can benefit from an efficient service regarding the cost and transit time.

Air Transport

Express service

When a delivery is urgent, Ma.Ra Logistics Quality makes available the Airline Express Service, with little transit time and direct flights to multiple destinations.

Standard & Direct

By partnerships signed, Ma.Ra Logistics Quality can provide you with a stable and reliable service for the transport of general goods, textiles, garment on coat hangers, exotic goods and other types of customized transport.

Multimodal

Our team can assist you in finding the best transport route, by combining the maritime and air transport, so that you can benefit from an efficient service regarding the cost and transit time.

Customs Assistance and Export Control

Customs Clearance

Because Ma.Ra Logistics organises both intracommunity and international transports, it makes available to its customers customs assistance services for the customs clearance processes of imported or exported merchandise both by the road transport service and maritime transport or naval transport service.

Thus, we assure you that the customs clearance is a procedure without problems and efficient, by assuring that your merchandise will have an optimal transit time up to the final destination.

Also in the area of customs compliance, we assist our clients with services such as:

- ❑ Import-export procedures and verification of document flows
- ❑ Tariff and customs classification in individual countries abroad
- ❑ Calculation and attribution of non-preferential and preferential origin (GSP)
- ❑ Applying free trade agreements

Export Control

Ma.Ra Logistics comes to exporters with a complex service which guides them to identify and minimize export risks and optimize the company's compliance program. In order to move into the complexity of global markets, it is necessary to comply with the rules and rules on trade in products and services, but an effective Export Control system is needed to verify in particular the legitimacy of military product and technology exchanges and avoid exporting dual-use products.

- ❑ We can transform trade compliance issues into a distinct commercial advantage over your competitors.
- ❑ Minimizing the risk of non-compliance situations that could disrupt business operations and limit your access to important markets.
- ❑ Our services and solutions focus on capacity building, enabling our clients to enhance their compliance efforts and utilize compliance as a business enabler, thereby creating a competitive advantage over their (potential) competitors.

Warehousing and Handling

We have storage space with fast access to the beltway of Bucharest and Motorway A2, which facilitates fast access to any area of the country. You will permanently know the situation of your stocks through the goods management system.

Warehousing services

Our warehouse is offering services like:

- ✔ Loading and unloading services
- ✔ Weighing of goods
- ✔ Pick & Pack standard operations for pallets, boxes, single piece, RTW - Ready to Wear, GOH - Garments on Hanger
- ✔ Palletizing services
- ✔ Packaging and labeling services
