

More than transport

International Expeditor

Present in the industry of internal and international transport of goods for more than 25 years, Mara Logistics is maintaining a key position in this sector, ensuring daily deliveries of goods from and towards any corner of the world.

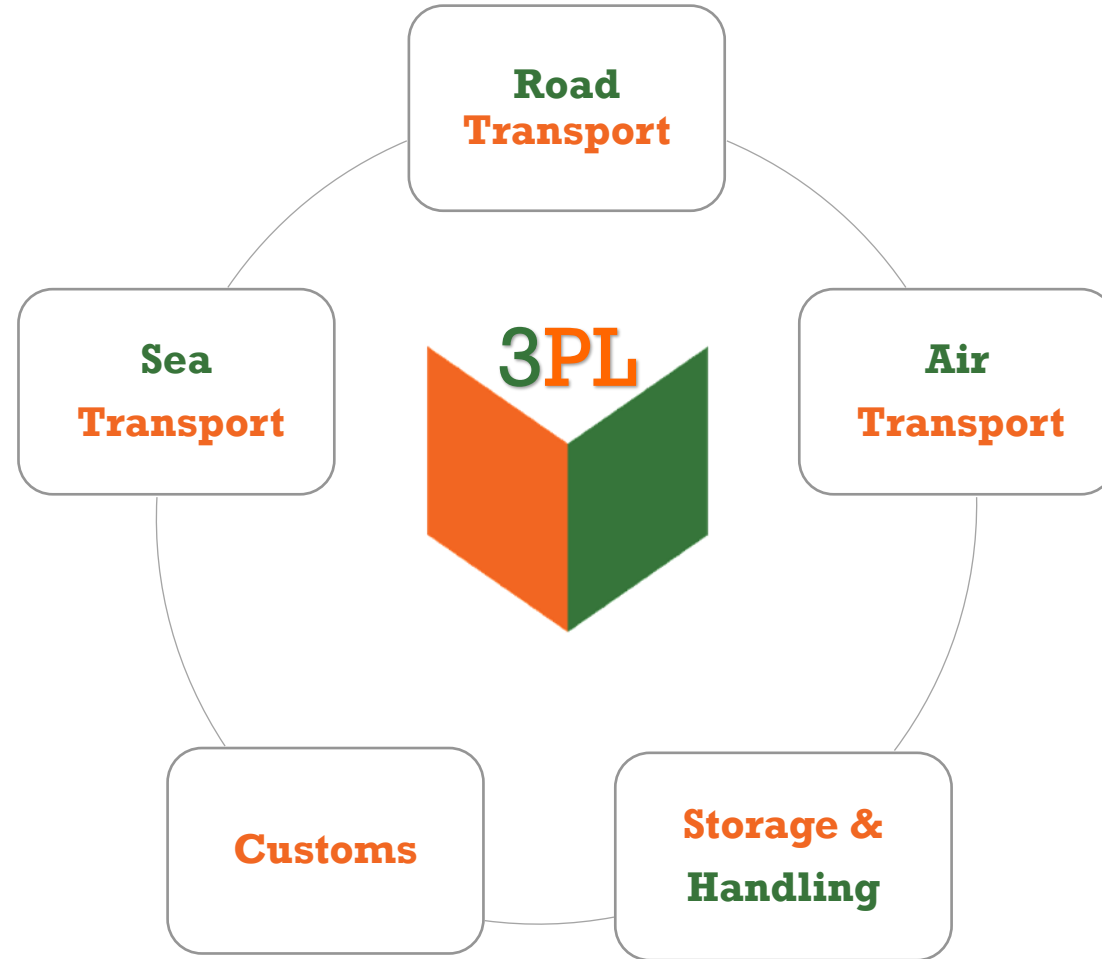

Together with partner Albin&Pitigliani, we bring to Romania the advantages of a global coverage network, which goes beyond any distance, language, culture and currency barriers and helps you extend your business by delivering, promptly and safely, your parcels or commodities.

5 Factors for success

1. **Global Coverage** - Over 200 correspondents all over the world;
2. **Relevant Experience** - Over 25 years of continuous development of resources and competences;
3. **Flexibility** - We know the specifics of our clients' activity and we deal with the entire logistic process;
4. **Specialized Services** - We develop customized transport solutions on an ongoing basis;
5. **Cost Advantage** - Through solid partnerships, we can guarantee cost competitiveness.

Through traffic lines with daily departures all over Europe, through strategic partners in North America, Asia and the Far East, we make sure that your goods are delivered safely and efficiently, regardless of their destination.

Services provided by MaRa Logistics

Road Transport

Customized service, suitable to your requirements

✦ **Transport of goods in a Less than Truck Load system (LTL)**

We collect and deliver door-to-door the various types of goods in a grouping system, with significant cost decrease for the client, optimizing the storage space, and rendering more efficient the times of transit, also achieving carbon emission reduction.

We offer transparency and predictability, which means that you are able to know the status of your delivery at any time.

✦ **Transport of goods in an express Full Truck Load system (FTL)**

For large quantities or volumes of goods, we have dedicated solutions with full transport in an express system.

Internal deliveries and towards neighboring countries can be completed in 24-48 hours.

✦ **International**

With a strong international network that shares IT procedures and systems, we provide solutions that simplify all EU and non-EU import and export processes.

✦ **Internal**

Through our own car fleet, we always have a solution suitable to the requirements of our clients on the territory of Romania.

For our road transport, we use Euro 6 trucks precisely because we wish to protect the environment and produce low carbon emissions. Our reports on CO2 emissions follow the CEN EN16258:2012 European standard. It establishes a common approach and framework to calculate the consumption of energy and the production of greenhouse gas emissions associated to transport services.

Maximum safety, guaranteed efficiency

Our worldwide network of correspondents allows for the delivery of your goods to the final destination regardless of the volume, quantity and variant of transport that you may choose – LCL or FCL.

📦 **LCL – Less Container Load**

If you do not have enough goods to load a full container, MaRa Logistics can collect and consolidate your company's goods with the goods of other companies in one container, to be delivered to the intended destination.

The quality of the provided services and the competitive costs are essential for this type of transport.

📦 **FCL – Full Container Load**

We can provide at your factory or to your provider all types of containers and the necessary documentation to transport goods in conditions of maximum safety.

📦 **Multimodal**

Our team can assist you in finding the best transport route, by combining sea and air transport, so that you may benefit from an efficient service in terms of cost and transit time.

Air Transport

Quick service, suitable to your requirements

The advantage of a strong global network provides quick and reliable solutions for great distance door-to-door services (right to the client's door).

Air transport solutions to or from farther and farther locations of the world generate significant value in our clients' projects.

When you have a delivery at a great distance, air transport is the fastest alternative.

Our team will assist you and provide the following solutions:

Express Service

Our team will assist you and provide the following solutions:

Standard and Direct

Through carefully selected partnerships, MaRa Logistics is capable of offering a stable and trustworthy service for general goods, for textiles and fashion, GOH, exotic products and other customized transport services.

- ✓ Door-to-door
- ✓ Airport-to-airport
- ✓ Door-to-airport
- ✓ Airport-to-door
- ✓ Customs consulting for drafting customs declarations and all documents necessary for import/ export/ re-export/transit operations.

Storage space with quick access to Bucharest Ring Road and A2 Highway, facilitating transit to any area of the country.

We are a provider of 3PL complete logistic services, that entail:

- ✦ Stock and stock level management
- ✦ Delivery of goods or reception of new stocks
- ✦ Freight transport solutions
- ✦ Pick & Pack standard operations for pallets, boxes, one piece, RTW, GOH
- ✦ Palletizing services
- ✦ Weighing, packing and labeling services
- ✦ Preparing orders for delivery
- ✦ Outsourcing
 - ✓ Outsourcing Operations
 - ✓ Client Services
 - ✓ Parcel Monitoring
 - ✓ Centralized Stock of Goods

Storage

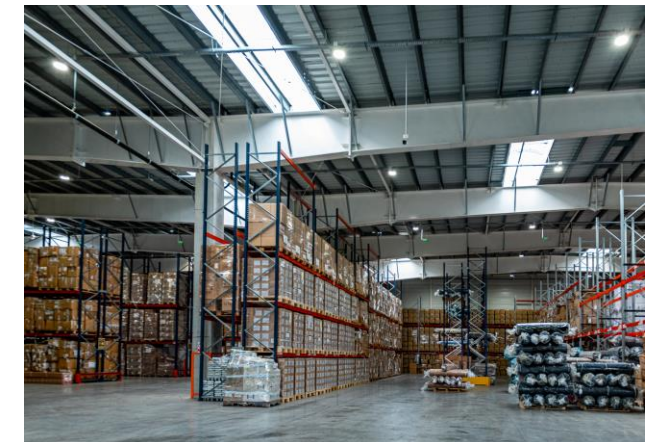

Our location to your advantage

We own spaces for the storage of palletized goods, as well as for the storage of garments on hangers, ready to offer full services, adapted to any industry.

The warehouse is equipped with modern, state-of-the-art facilities, able to offer high-quality services to all clients. Advanced logistics systems and state-of-the-art technology enable efficient stock management and accelerated processes.

We have maximized the efficiency of loading/unloading goods without interruptions in an organized manner, thanks to the multiple ramps

We have an advanced security system to protect the entire warehouse infrastructure and the clients' goods. Access control, video surveillance and strict security measures are implemented with maximum seriousness, providing the confidentiality and protection of every stored product.

Customs Assistance and Export Control

In the field of customs compliance, we assist clients with services such as:

- ✦ Import-export procedures and check document flows
- ✦ Prepare the documentation to obtain the Eori certificate
- ✦ Rate and customs classification in individual countries abroad
- ✦ Calculate and assign the non-preferential and preferential origin (GSP)
- ✦ Apply free trade agreements

Export Control

We provide a complex service guiding clients to identify and minimize export risks and optimize the company's compliance program.

In order to comply with the rules related to trade in products and services, an efficient export control system needs to be implemented. This system is meant to check particularly the legitimacy of military product and technology exchanges, thus ensuring that the export of products with a double use potential is avoided.

- ✦ We can turn trading compliance issues into a distinct trading advantage to that of our competitor.
- ✦ Minimizing the risk of non-compliance situations that may disturb business operations and that may limit your access to important markets.
- ✦ Our services and solutions focus on consolidating the capacity, allowing our clients to improve the compliance efforts and to use compliance as a support factor to business, thus creating a competitive advantage to that of our competitors.

Integrated Management and AEO Authorization System

Our goal is to develop business in a responsible manner to the environment, civil society and our employees. For more than 10 years we have implemented and have been maintaining an Integrated Management System that guarantees:

- ✓ Care towards satisfying our clients;
- ✓ Promptness in supplying services;
- ✓ Compliance with the legal provisions and other requirements applicable in the industry;
- ✓ Implication and motivation of employees;
- ✓ Low service costs, ensuring:
 - ✓ Pollution prevention;
 - ✓ Reduction of our business' impact on the environment;
 - ✓ Prevention of accidents and illnesses.

The Company also has the status of AEOC authorized economic operator – customs simplifications – that guarantees:

- ✓ Reduction of the number of physical checks and documentation;
- ✓ Priority treatment of deliveries if selected for control;
- ✓ Possibility to choose location to make controls;

Our care for the environment and the future generations

As all industries make great efforts to become greener, so the industry of transports must make a significant contribution. We are involved in this environmental protection movement, becoming a provider of green logistics services. We are aware that, as transport progresses, CO2 emissions can be reduced significantly.

This has considerably improved service quality, has reduced the number of low-efficiency and low-volume vehicles, also achieving a significant reduction of carbon emissions. For road transport, we are using Euro 6 trucks precisely because we wish to protect the environment and achieve low carbon emissions.

Beginning with the design project for the new warehouse and office, we have prioritized the reduction of power consumption by incorporating a design that would allow natural light to enter inside. Moreover, we have implemented various strategies to minimize the use of paper and other consumables with a significant impact on environmental degradation.

We have set up a solar panel system, beginning with March 2023, that not only responds to our power needs, but also injects the power surplus into the grid, thus benefiting the neighboring community.

We are proud of being neutral in terms of carbon emissions, and we believe that any effort in this direction provides a better life and a safer future to the generations to come.

Happy Employees = Satisfied Clients

We pay special attention to our employees and we are concerned with their welfare, providing work conditions that would comply with the highest standards.

We believe that the health of our employees is as important as the company's welfare. Therefore, we provide them with the possibility to stay fit in a specially designed gym. Moreover, we provide a dedicated trainer, making sure that they benefit from the best training, adopting a healthy lifestyle.

In the relaxation area, we have state-of-the-art massage armchairs for a relaxing break. We provide enough space, as well as two-way adjustable ergonomic desks to make sure that the working position complies with the newest recommendations in the field.

Taking into account the working conditions and environment, we have succeeded in preserving our employees even on an extremely competitive work market, so that we may provide to our clients a united, experienced team, with a length of service of 20 years in our company.
